Qualifications for approval for a natural gas well to be transferred for domestic use - The following boxes must be checked as true and correct in order for this application to be approved:

- The natural gas produced from this well does not contain Hydrogen Sulfide Gas (H2S).
- Any natural gas produced from this well is not gathered for resale or distribution to others.
- The well has not produced gas in commercial quantities during the previous twenty-four (24) calendar months.
- The natural gas produced from this well will be used on the property where the well is located.
- Written documentation is attached to this application from all owner(s), as defined in Ark. Code Ann. § 15-72-102 (9), and all mineral owners in the drilling unit or lease (if applicable) upon which the well is located, stating that they do not object to the transfer of the well to the surface owner.

Qualifications for approval for a oil or natural gas well to be transferred for domestic use as a freshwater supply well - The following boxes must be checked as true and correct in order for this application to be approved:

- This well can only be used for a fresh water supply well.
- This form is filed prior to commencement of plugging operations.
- Plugging operations must conform to current Commission plugging requirements with respect to all oil and natural gas producing zones and a 100' cement plug is placed on the inside and outside of the production casing if left in the well. If production casing is pulled, a 100' cement plug shall be placed in the well bore. If production casing is pulled and the fresh water zone is found within the surface casing, a 100' cement plug shall be placed 50' inside and 50' outside the base of the surface casing of the well.
- All related surface production equipment is removed from the well site.

CERTIFICATE

I hereby certify that I am authorized to submit this application, which was prepared by me or under my supervision. The facts and proposals made herein are true, correct and complete to the best of my knowledge and belief.

Upon approval of this application and the transfer of the above referenced well to domestic use, all regulatory oversight of the well by the AOGC shall terminate and the well shall become the sole responsibility of the Surface Owner. However, the well shall be subject to any applicable state laws regarding private fresh water wells or domestic natural gas supply wells administered by state and federal agencies other than the AOGC. Surface Owner also assumes all liability and costs, both present and future, to repair the well in case of leaks during well operation and to properly plug the well. Surface Owner is hereby informed that any natural gas coming from the well may contain hydrogen sulfide ("H2S"), or other contaminants, which may be hazardous to your health or even fatal. Surface Owner is advised to take all necessary precautions when using natural gas from the well.

INSTRUCTIONS

This form must be filed by the current Permit Holder

This application for the conversion of a permitted oil or natural gas well to domestic use must be submitted and approved by the Permit Holder and all required cement plugs set according to Commission rules prior to the land owner commencing domestic use of said well.

All Sections of this application must be completed in their entirety if required.

Sign, date and submit this form with all attachments to the appropriate regional office.
